Event: WSK Euro Series 2010 – La Conca (Italy)

Tony Kart Junior Racing Team

WSK EURO SERIES

MARCH 4th/7th, CIRCUITO INTERNAZIONALE LA CONCA (ITALY)

Tony Kart Junior Racing Team defending the KF2 WSK Euro Series Title

The Tony Kart Junior Team made its début with its new line up on the occasion of the 15th edition of the Winter Cup race taking place in Lonato. All the drivers proved to have an excellent feeling with the technical material, Tony Kart chassis and Vortex engines, just homologated.

Though the weather conditions were not optimal, during the 15th edition of the Winter Cup the work carried out by the team led by Paul Spencer has been positive and there is a good chance to get great results during the forthcoming WSK Continental Championship.

The Tony Kart Junior Team is starting the WSK competition boasting the KF2 Title, which was obtained during the last two editions, with Flavio Camponeschi in 2007 and with Ben Cooper in 2008.

The team is going to take part in the WSK Continental and World Series, aiming at the KF2 and KF3 Title.

The technical material placed at the Junior Team's disposal is top quality, actually the chassis they are using are the Tony Kart Racers EVR (30mm diameter) and the Kryptons (32mm diameter). The engines are the latest ones manufactured by Vortex, the RAD model. A technical package which will be optimized and improved to have the best performances together with the Vega XM tires, used in KF2 and the Dunlop, used in the cadet category.

Paul Spencer - Tony Kart Junior Racing Team Team Manager

"We tested in La Conca during the past weeks and now we will put into practice the work we carried out so far. We know we will have to fight quite hard starting from the collective tests, but this will allow us to work in the best way."
